

HTML PRACTICAL EXERCISE

In this course, you will learn in English the basic of HTML.

HTML and CSS are the two types of code that you will have in every website. Don't be afraid, it is not hard. So, let's start!

Action1: First of all, download the elements present in this link:

<https://github.com/AnsaryMarecar/web-basic-courses/>

Click on code → Download ZIP (it will download all the folder in a ZIP file) [FIGURE1]

Action2: Unzip* the file and put the unzipped file on your Windows Desktop*. After that, click on temperature.html it will open a web page on Mozilla navigator*

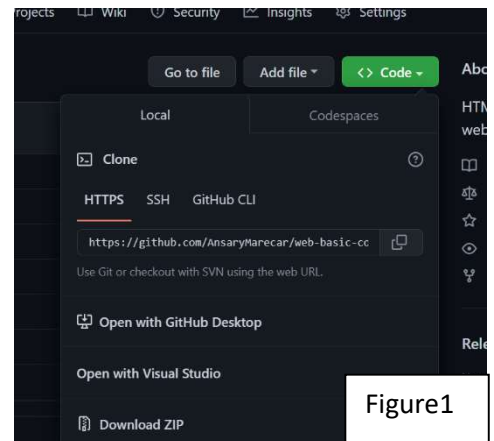

Figure1

Question1: What do you see on your screen? Explain-it in English

Action3: Now, open Notepad++. To find this application, press* the windows-key* and search-it. [FIGURE2]

Action4: Open index.html with Notepad++ (fichier[File] → Ouvrir[Open]).

Question2: Describe in one word what you see:

Action5:

Edit on line 5, "Weather station"* by: "My Weather station".

Erase* line 15.

Save file with: Press* 'CTRL' key* and 's' key* on your keyboard*.

Action6: Refresh the web page on Mozilla

Question3: describe the difference between then and now*

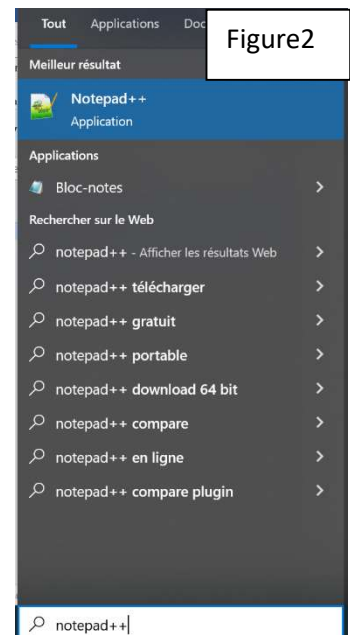

Figure2

Action7: Edit <h1>Weather station</h1> by <h1>London Weather station</h1>, save the file and refresh the web page on Mozilla. Again, look the difference between then and now.

Action8: Add a new temperature it needs to be like the other temperature lines. Save the file and refresh the web page on Mozilla. Again, look the difference between then and now.
